Funding the future: Help us bring a da Vinci Surgical System to Newport Hospital

Newport Hospital's skilled surgical team delivers exceptional patient care, achieving outstanding outcomes across a wide range of procedures.

Today, these surgeries are performed using traditional open and laparoscopic techniques. With your partnership, we can bring advanced robotic surgical technologies—the new gold standard at top-tier hospitals—to Newport Hospital.

Our goal is to acquire the da Vinci Surgical System, a leading-edge robotic platform that enables surgeons to perform minimally invasive procedures with unparalleled precision, flexibility, and control.

Game-changing technology, life-changing results

Having the da Vinci's game-changing technology at their disposal will elevate the care our surgeons are able to deliver and produce truly life-changing results.

The da Vinci Surgical System enhances a surgeon's capabilities by offering:

- 3D high-definition view with 10X magnification for optimum anatomy identification,
- Wristed instruments that allow for greater dexterity, and
- Improved ergonomics that provide a comfortable sitting work position to reduce fatigue during long procedures.

For our patients, the benefits of precise, personalized robotic-assisted surgery are equally impressive:

- Smaller incisions, less scarring, and lower risk of infection,
- Reduced blood loss,
- Less post-operative pain,
- Faster recovery times, and
- Shorter hospital stays.

Funding the future: Help us bring a da Vinci Surgical System to Newport Hospital

Recruitment, training— and care close to home

In addition to the many benefits the da Vinci Surgical System will provide, having this innovative and sophisticated robotic technology at Newport Hospital will help us attract and retain our next generation of outstanding surgeons. It will also address a critical community need: many of our patients here on Aquidneck Island face transportation, financial, and health literacy barriers that make travel to distant hospitals challenging. Securing a da Vinci Surgical System will ensure our friends, neighbors, and family members continue to have access to the highest quality healthcare, close to home.

Why your support matters

Acquiring this advanced, state-of-the-art tool represents a significant investment, and we must raise **\$2.5 million** to bring the da Vinci Surgical System to Newport Hospital. With your support, we can make this vision a reality. Together, we'll ensure that every patient in Newport County has access to the best surgical care available—close to home, where it matters most.

To support this important project or find out more, please call the Newport Hospital Foundation at 401-845-1763.
